

Intellectual Property Right (IPR) Workshop, DTU

E-Cell DTU, in collaboration with IPR Cell, DTU welcomes you to the DTU Patent Workshop.

What is a Patent?

- If you invent something that you believe to be unique and commercially viable, you should consider applying for a patent to protect your right to its use.
- A patent enables you to enjoy a royalty or part of profits in anything that uses your idea.
- A Patent might not be only scientific, it can be an idea, technology, research or even your startup.

Advantages of Patents:

- 1) A patent gives you the *right to stop others from copying, manufacturing, selling or importing your invention without your permission.*
- 2) You get *protection for a pre-determined period, allowing you to keep competitors at bay.*
- 3) You can then *use your invention yourself.*
- 4) Alternatively, you can *license your patent for others to use it, or sell it, as with any asset.* This can provide *an important source of revenue for your business.* Indeed, some businesses exist solely to collect the royalties from a patent they have licensed - perhaps in combination with a registered design and trade mark.

Benefits of getting a Patent done through DTU:

- 1) Getting a patent for your idea/research/invention is ***extremely expensive*** from an outside organization, or agency, we making it the most easy and convenient thing to do!
- 2) All costs like ***registration, research, patent fee, legal fee to be beared by DTU.***
- 3) An amazing thing to ***highlight in your MS and job applications.***
- 4) ***Boost up your CV*** giving you edge over other students ***during Placements/Internships.***
- 5) ***Better college reputation and ranking*** which would indirectly help the students.

E-Cell DTU with IPR Cell DTU, brings to you the first edition of **DTU Patent Challenge!**
