INTELLIGENT AUTOMOTIVE DESIGN
|| 6 Week Internship Programme 2021||

6WIP 2021 IAD

Automotive design is a vast creative process which encompasses interior and exterior design as well as the ergonomics to define the appearance of a motor vehicle. It ranges from cars to buses to motorcycles and even rickshaws.

This specialisation helps understand the various ways and methods that are important and are used to design vehicles. It ranges from unique lines and rough figures to minute details and functions which makes it look special.

Real life experiences, real projects and direct mentoring from experienced designers!! An internship in Automotive Design offers a chance to step into an advanced and ever growing design industry. This will not only help set you apart on your resume but also in your skills, abilities and experience.

This internship will allow you to meet and work together with a talented group of students from around the place and become part of a multi-disciplinary team focused on both individual and group projects.

The Department of Design of Delhi Technological University is offering a 6-week Internship program during the Given summer Break. Details are as given below:

- ◆ Dates: From 1st June to 15th July 2021, 6 weeks
