

## GUIDELINES AND INFORMATION REGARDING NEW INTERNET CONNECTIVITY

- To **login/logout** in DTU network open **dtulogin.dce.edu** or **https://10.50.0.100/connect/PortalMain** in your browser. If login screen does not appear follow **Advanced→Proceed to 10.50.0.100 (Unsafe)**.
- Login account is created and distributed to all users to access the network. Please do not share your login credentials with anyone. Users are responsible for privacy of their password and misuse of their account. To reset your password, kindly visit computer centre and contact Mr. Vinod Saini.
- **All students and users of DTU internet facilities are requested not to install their own WiFi router/access point/device without permission of Head, Computer Centre. This may bring down section of network where these devices are installed. Even if you want to install your own WiFi device, please get it configured and approved by DTU Computer Centre. Please insist on device password while configuring WiFi router. Any WiFi device not approved by DTU Computer Centre will be seized if found installed anywhere in DTU campus.**
- Please do not try to integrate MTNL/private party internet/broadband connection with DTU network. This may bring down the DTU network.
- For official guests staying in guest house, temporary guest login account will be issued to guests on request from Officer-in-charge, guesthouse. Password will be directly communicated to guest via SMS.
- Students staying in DTU hostels are advised go get their Wi-Fi device configured by DTU computer centre. Many illegal WiFi devices have been detected in hostels. These are creating problems in DTU network and in some hostel area where these devices are installed, students may face connectivity problem.
- While using DTU network, set your Local Area Network (LAN)/Ethernet setting as follows: **Local Area Network → properties → Internet Protocol Version 4 (TCP/IP V4) as follows:**
